The first EMEUNET Country liaison meeting at EULAR 2014:

With the EMEUNET network exceeding 900 members to date, we set our minds to bringing together the people who make this possible – the country liaisons. So, at this year’s EULAR Congress in Paris, aside from the EMEUNET booth we planned a face-to-face meeting for our country liaisons. The odds were in our favor: more than 15 countries were represented, together with members of the EMEUNET Steering Committee and Working Group. It was an interactive, lively meeting, where points were raised, experiences were shared and ideas were put forward. Addressing the specific needs of young rheumatologists in each country remains our priority, and, despite huge advances to date, we are not complacent and constantly aim for improvement.

With such a dedicated team, the prospects are great!

We kindly thank all who participated and supported this event! Let this be the first of a long series of productive meetings to come!
