SPECIAL EDITION:
EMEUNET SUBGROUPS
AND ACTIVITIES
Dear young rheumatologists and researchers in rheumatology,

We are happy to present you a new issue of EMEUNEWS to introduce EMEUNET Subgroups and activities.

The EMEUNET Working Group represents the EMEUNET Community, undertakes the organisational role and currently has 43 people from most of the 21 EULAR Countries. The work is divided among 7 Subgroups to cover the wide aims of EMEUNET. From education to peer mentoring, from country liaison to social media, EMEUNET Subgroups ensure the growth of EMEUNET community and promote interaction and networking among members.

If you would like to join the EMEUNET Working Group and be actively involved in the Subgroups' activities keep an eye on emails from EMEUNET and do not miss next call for application! If you already applied but have not been selected, this does not preclude you to apply again the following year.

In this issue you will also find details about upcoming educational events.

If this is your first contact with EMEUNET, we invite you to explore more and join us via our website (http://emeunet.eular.org). If you are already part of our community, we kindly remind you that sharing is caring. Spread the word about our activities and work and help us reach more young rheumatologists and researchers.

We hope that you enjoy reading this Newsletter and would be happy to receive any comments or contributions for future issues.

The EMEUNET Newsletter Subgroup
THE EMEUNET STEERING COMMITTEE 2016-2017

Elena Nikiphorou
MBBS/BSc, MRCP, MD (Res), PGCME, FHEA

Chair-elect

Elena is a clinical researcher within the Academic Rheumatology Department of King’s College London and a consultant rheumatologist at the Whittington Hospital, UK. Her main research interests focus on clinical outcomes and multimorbidity of rheumatoid arthritis and spondyloarthritis. She has undertaken her MD (epidemiological) Research on outcomes of structural damage in Rheumatoid Arthritis at University College London, where she also completed her medical studies and BSc in Physiology (First Class Honours). Elena is currently the Chair-Elect for EMEUNET.

Sofia Ramiro
MD PhD

Chair

Sofia is a rheumatology trainee at the Leiden University Medical Center, Leiden, the Netherlands. She has recently finished her PhD at the University of Amsterdam on long-term outcomes in ankylosing spondylitis under the supervision of Prof. Landewé and Prof. van der Heijde. She has done a Master in Epidemiology at Maastricht University. Her research focuses on axial spondyloarthritis, rheumatoid arthritis, imaging and outcomes research. She comes originally from Portugal and has an appointment at Nova Medical School in Lisbon. Sofia is the Chair of EMEUNET.

Anna Moltó
MD PhD

Past Chair

Anna became a rheumatologist in 2010, and in 2016 defended her PhD thesis on diagnosis and treatment in real life of early axial spondyloarthritis. She is currently a staff Rheumatologist and Clinical/Epidemiological researcher in Pr Dougdados Department of Rheumatology in Cochin Hospital in Paris. Her professional and scientific interests focus on outcome measures, especially in spondyloarthritis and rheumatoid arthritis and pregnancy in rheumatic inflammatory diseases. Anna is the Past Chair of EMEUNET.

EMEUNET is a network of young clinicians and researchers in the field of rheumatology in Europe. The main objectives of EMEUNET are to enhance the quality of education and to promote research and create collaborations among emerging rheumatologists and researchers.

None of these objectives could be fulfilled without the work and enthusiasm of the people involved in the 7 subgroups that form the Working Group of EMEUNET: Education, Peer Mentoring, Newsletters, Social Media, Visibility, Country Liaisons and Global Affairs.

EMEUNET subgroups are enthusiastically engaged in several activities, and the list of current and upcoming projects has quickly expanded over the past few months.

With all these initiatives and activities that are presented in this Newsletter, we hope that EMEUNET will continue to be embraced by the young rheumatology community and more and more young clinicians and researchers in rheumatology will become involved in rheumatology education, research and EULAR, making EMEUNET a successful and influential resource that fosters new and long-term collaborative endeavours and ensures that excellence in European Rheumatology and EULAR is maintained.

Sofía Ramiro, Elena Nikiphorou and Anna Moltó
Aim of the Education Subgroup is to improve the clinical and scientific knowledge and educational support for young rheumatologists/researchers (trainees and specialists included, < 40 years of age) working in the field of rheumatology in Europe and beyond. When EMEUNET started its activities, a large online survey (more than 700 participants) was used to assess the educational needs of young rheumatologists and researchers. The educational sub-group was formed to meet these needs, by providing information about existing educational programmes as well as funding opportunities (by EULAR and other organizations) and develop new educational opportunities. Over the past years, EMEUNET has expanded and is now engaged in several educational activities, in conjunction with ESCET, the EULAR standing committee of education, EULAR school of rheumatology and other EULAR committees. Successful ongoing projects are as follows: Undergoing the update of the EMEUNET website for educational content; EMEUNET-EULAR fellow sessions- proposing clinical and scientific sessions at the annual EULAR meetings with special interest for young attenders; EMEUNET-EULAR ambassador programme, to support 1st time attendees and match them with an experienced member with similar interests at the annual EULAR congress (see photos from the 2016 EMEUNET-EULAR ambassador programme in the next page); selection of EMEUNET members in EULAR recommendation committees; EMEUNET educational calendar- to inform about educational events/ deadlines, development of the EMEUNET/EULAR immunology course the 1st Immunology course in April 2016 (see photos taken at the 1st Immunology course in the next pages). New projects include exploring the need of a pan-European educational portfolio (in collaboration with the EULAR school of rheumatology) and development of a range of useful ‘how to’ guides for EMEUNET members who are early career researchers. In addition, from this year EMEUNET is actively involved as co-organizer of the EULAR epidemiology course (see the group photo of last edition of the course in the next page and the call for the 2017 course at page 24).

THE 4TH EULAR EPIDEMIOLOGY COURSE, 2015
THE 1ST EULAR-EMEUNET IMMUNOLOGY COURSE
Rucsandra is a resident in Rheumatology and PhD student from Romania. She is currently working as a clinical science research fellow within the Division of Rheumatology, University Hospital Zurich. Her main areas of interest are systemic sclerosis and other connective tissue diseases.

Javier is a postdoctoral researcher at the University of Oviedo (Spain). After completing a research stay at the Academic Medical Centre (Amsterdam, The Netherlands) he obtained his PhD degree from the University of Oviedo in 2015. His main interests are the endothelial damage and vascular repair in rheumatic diseases, mainly focusing on translational biomarkers for cardiovascular risk assessment.

The main aims of the Country Liaison Subgroup are:

1) **To encourage and support the Country Liaisons and to maintain an active network of Country Liaisons:** the Country Liaisons network is a key element in the communication between EMEUNET and the young rheumatologists and researchers at the national level. Thus, we work together to spread all relevant information from EMEUNET to the different countries and also to gain feedback from them to identify the new needs and opportunities to be satisfied.

2) **To promote EMEUNET and to distribute EMEUNET/EULAR information:** we aim to reach and attract the young rheumatologists and researchers in Europe to become EMEUNET members and to participate in EMEUNET activities. To this aim, we work closely with our Country Liaisons, on whom we rely to distribute all the information from EMEUNET and to perform all kind of activities and events at the national level aimed to increase the adherence to and visibility of EMEUNET.

3) To prepare and update EMEUNET advertising materials: we have a very useful collection of advertising materials (flyers, slides and posters) to help the Country Liaisons to expand and advertise the EMEUNET network. 4) To advertise and improve the visibility of the Country Liaisons activities: we frequently report the different activities organized by the Country Liaisons on social media and EMEUNET Newsletters, in collaboration with the EMEUNET Newsletters and Social Media subgroups. We also organize yearly the Country Liaisons meeting.

THE 2nd COUNTRY LIAISON MEETING AT EULAR 2015

THE 3rd COUNTRY LIAISON MEETING AT EULAR 2016
The EMEUNET social media team is in charge of representing the agenda and opportunities of EMEUNET via different channels website, emails, Facebook, Twitter, LinkedIn and Youtube. The core of all information is our website, that has been online since June 2012 and ever since has had increasing traffic with an average of over 8000 monthly visitors from around the world. We joined the social media by launching the EMEUNET Facebook page in February 2014 and a Twitter feed in September 2014 to ensure close contact with our members. A YouTube channel is also available since May 2015 and in October 2016 we launched our profile on LinkedIn, to reach a broader audience, especially those who are not engaged in Twitter or Facebook. Our main goals are to increase EMEUNET’s visibility and reach out to young rheumatologists and researchers in Rheumatology across the world. We also have a specific role in being the “voice” of Annals of Rheumatic Diseases (ARD) on social media platforms, by closely collaborating with the ARD Team of the British Medical Journal (BMJ) to enhance the profile and activity of the Journal on these platforms.

We are responsible for managing and updating the content of all Social Media Platforms: website, Facebook page, Twitter account, email messages, LinkedIn account and YouTube channel. You can find all the up to date information on the website and easily connect with other members with similar areas of interest. Facebook and Twitter are readily accessible platforms, very intuitive, where you can follow all ongoing activities, deadlines and projects as they take place! This is why we would like to encourage all our members and also non-members to join and support these initiatives. Our aims include reaching out to as many young rheumatologists as possible through all platforms, sharing scientific and educational content as well as specific opportunities worldwide. Our ultimate goal is to support EMEUNET in its initiative to keep every young rheumatologist in the world informed and involved in educational, clinical and research activities. Through our collaboration with ARD/BMJ, we hope to promote high quality clinical and research material and engagement of the wider rheumatology community on social media platforms.
What our Social Media Platforms provide:

- Information about what’s going on

On our website, Twitter, Facebook and LinkedIn pages you will find announcements of interesting conferences, useful courses or exchange programs. We will update you with important information about registrations to conferences and bursaries, links to educational content, calendar of activities, job offers and newsletters. As a logged-in member you have full access to all the content of the website, including all newsletters and the membership database. Our website is especially designed for the needs of young rheumatologists and it is the only webpage gathering information about rheumatology worldwide.

Connect Members – allow interaction

Once registered on our website, you become part of the EMEUNET network. You gain access to the EMEUNET Membership-database, where you can get in contact with other members, share information or initiate collaborations. After reaching the EMEUNET age limit (40 years), you will become part of the Alumni Network, with a specific database and still keep access to all EMEUNET content.

- Provide important links & tools

The website provides important research/clinical links for you, which should simplify your daily life as a rheumatologist or scientist. We have links to online tools, funding opportunities and all important Rheumatology Journals.

- Mailing service

After becoming an EMEUNET member you will receive regular updates (job offers, courses and many more) and our EMEUNET newsletters (e.g. EULAR and ACR highlights) by mail.

- YouTube

In May 2015 we started a YouTube channel, where you can find interviews with fascinating rheumatologists and short video introductions about our different working groups to explore EMEUNET further. In the future we will increase our video archive with short reports on events and rheumatology related videos.

- Twitter Education

In addition to keeping our members up to date on Rheumatology news and events we also run a yearly Twitter course in the lead up to EULAR. The course runs over 10 consecutive weekdays. Each day, each participant is emailed a short task followed by details of how to complete this task (starting with setting up a Twitter account). These tasks take 5-10 minutes so there is no big time commitment. It has proved successful in the last two years with loads of our members using this course to become familiar with Twitter.

Felice is currently a Marie Curie Research Fellow at the Department of Rheumatology of Queen Mary University of London, where he is working on a research project aiming at assessing the involvement of mast cells in the pathogenesis of RA, specifically studying the presence of mast cells in the synovia of RA patients as a marker of disease severity, progression and response to therapy. He is a Clinical Immunologist since 2014 and also works as Honorary Clinical Fellow at the Department of Rheumatology of Barts Health NHS Trust. Felice is also a member of EMEUNET Education Subgroup.

The visibility Subgroup’s tasks mainly comprise the setting up of the EMEUNET corner at the EULAR annual meeting and the organization of social events for EMEUNET members at EULAR and ACR annual meetings. The EMEUNET corner is the ‘headquarter’ for EMEUNET members at the EULAR meetings, where they can meet, get informed and discuss. EMEUNET social events are organized in every city where EULAR/ACR meetings take place. Finally, this year we are contacting past EMEUNET chairs to organize a committee of experts to advise us on current and future activities.

ACTIVITIES

THE EMEUNET BOOTH AT EULAR 2016 CONGRESS

THE EMEUNET NETWORKING EVENT AT EULAR 2016 CONGRESS

THE EMEUNET NETWORKING EVENT AT ACR 2016 CONGRESS
The EMEUNET Newsletter ‘EMEUNews’ is aimed at spreading any information considered useful to young rheumatologists/researchers of the EMEUNET community. Together with EMEUNET’s Social Media, EMEUNews can be considered the ‘voice’ of EMEUNET. EMEUNews is released monthly with 11 issues per year. Newsletters promote EMEUNET’s visibility, by introducing working group members (August issue) and country liaisons (March issue) as well as by showing the different activities of the Subgroups (February issue). They also report about Do-Not-Miss Abstracts (May and October issues) and Abstract Highlights (July and December issues) of EULAR and ACR and provide press reviews to highlight most recent rheumatology literature (January, April and September issues). All EMEUNews issues also include general information about EMEUNET, upcoming events, abstract deadlines, fellowships, courses, grants, etc. Recently, a new format of EMEUNews, the EMEUNET one year in review, has been started to provide an overview of EMEUNET achievements and growth over the past year (June issue).

Alexandre Sepriano, MD works as rheumatologist at the Hospital Egas Moniz, Lisbon, Portugal and a PhD applicant at the Rheumatology Dept., Leiden University Medical Center, The Netherlands. His research activity is mainly focused on spondyloarthritis and epidemiology.

The aim of the Peer-Mentoring subgroup is to help young rheumatologists to have more access and information to interact with mentors and leading clinicians/researchers in the field of Rheumatology. In addition we encourage the exchange of ideas between peers and provide an opportunity to interact with rheumatologists with similar research interests. Ongoing projects are the following:

- Collaboration with Annals of Rheumatic Diseases (ARD): to train EMEUNET members as reviewers for the journal under the supervision of senior reviewers.

- Mentor-mentee meetings at international conferences (e.g. ACR and EULAR): informal meetings between EMEUNET members and experts in the field of rheumatology to discuss possible career plans, research options, training etc.

- EULAR centres of excellence glossary: to promote research collaborations between EMEUNET members and research institutes in Europe (full database online only for EMEUNET members: http://emeunet.eular.org/centres_excellence.cfm).

THE MENTOR-MENTEE MEETINGS AT EULAR 2016

THE MENTOR-MENTEE MEETINGS AT ACR 2016
EMEUNET Peer Review Mentoring for Rheumatology Journals

Due to the relevance of the peer review system in the scientific career, EMEUNET started in 2012 a collaboration with the leading journal in rheumatology, the Annals of the Rheumatic Diseases, aimed to improve the peer review skills of your rheumatologists and researchers. Since then, this innovative program has been received with enormous attention by all the EMEUNET community and it has been continuously growing. Recently, we developed an online survey to further improve this program. For more information you can visit: [http://emeunet.eular.org/peer_mentoring.cfm](http://emeunet.eular.org/peer_mentoring.cfm)

The EMEUNET Peer Mentoring subgroup is actively working on finishing the last steps before launching the next edition. This new edition will bring important novel aspects, new top-level mentors and a broader selection of research topics, as well as a higher number of places available.

The call for the next edition will be launched in the coming weeks, and it will be announced in the EMEUNET Social Media, website and by e-mail.

Ready to become an independent reviewer? Pay attention to our social media and do not miss the opportunity to apply!!
GLOBAL AFFAIRS

Co-leaders: Christophe Richez, MD PhD; Marie Kostine, MD

The new objectives of the Global Affairs subgroup are:
✓ To interact with Young PARE, a subgroup of PARE (People with Arthritis/Rheumatism in Europe) aiming to communicate the specific needs of young people with rheumatic and musculoskeletal diseases;
✓ To develop interactions between other Young Specialists Organisations for improving the management of our patients and gathering our strengths for a better translational research on diseases shared by our specialties.

We met during the last EULAR congress few representatives of young PARE and decided to develop strong interactions in the next future, especially in social media and eHealth fields.

We also met, during a dedicated meeting organised by EULAR, the chairs of Y-ECCO (Young-European Crohn’s and Colitis Organisation), young PRES (Paediatric Rheumatology European Society), and the Young Nephrologists’ Platform.

During this one-and-a-half-hour meeting, we exchanged information about our different organisations, the content of our working groups, our interaction with our mentors, and how we could work together in the future. We believe that we could extend our interests, collaboration and programmes far beyond. We are currently preparing a survey to know how young clinicians see multi/transdisciplinarity.

THE EULAR EPIDEMIOLOGY COURSE

This year’s course will cover the topic of outcome measures, from how to develop and validate them to their measurement properties.

WHERE AND WHEN? Berlin, 30 June & 1 July 2017 (2 day-course)

FOR WHOM? This 2-day course is aimed at young rheumatologists/HPR/researchers with at least some previous experience in epidemiology/outcomes research/clinical trials/statistics.

WHY? The main goal of the course is to increase the interest, knowledge and skills of young researchers in epidemiology and outcome measures and to stimulate critical thinking in the design and reading of research studies. Furthermore, the course will also allow young researchers to get together, which will facilitate future collaborations; as well as interact with the prestigious speakers.

HOW MUCH? This EULAR Course costs 425 euros (with 1 night accommodation) or 500 Euros (with 2 nights accommodation); this includes the courses, all meals and hotel (so additionally you only have to pay the travel costs). You may also ask for a EULAR bursary which will cover the Course costs (or ask for pharma company support if you wish).

HOW TO PARTICIPATE? The number of participants is limited to 45 and this is a competitive application process! Applicants will be selected based on their curriculum vitae/application form.

For more information, please refer to:
EULAR website: http://www.eular.org/edu_course_epidemiology.cfm

You can find some additional information on previous courses with feedback from participants:

Applications are now open! The application deadline is 30th March 2017 but the sooner you sign up, the better.

Bursary applications can be made through: http://www.eular.org/bursary_app_epidemiology.cfm

The epidemiology course application form should be sent to:
Mrs Gaëlle Notzli, c/o MCI Suisse SA
Phone: +41 22 33 99 628
Fax: +41 22 33 99 601
E-mail: Gaelle.Notzli@mci-group.com
THE EULAR ULTRASOUND COURSES

The aim of this annual multi-level course is to cover the whole spectrum of conditions in which musculoskeletal Ultrasound (MSUS) could be used in rheumatology practice and research. The advanced course (for up to 50 participants with considerable experience in MSUS) focuses on difficult issues within MSUS and emerging research fields in MSUS (contrast enhanced, 3D, quantification of inflammation). This includes time for discussion with expert rheumatologists and radiologists in MSUS. The intermediate course (for up to 50 participants with some experience in MSUS) aims at consolidating standardised MSUS scanning methods according to EULAR guidelines, as well as describing and identifying musculoskeletal lesions/abnormalities by US and knowing the role of MSUS in different musculoskeletal pathologies (inflammatory, degenerative and/or traumatic). The standardised approach in the study of the various anatomic regions as well as the future development of US technique and its role as a research tool is discussed.

NEW: The EULAR-PReS paediatric musculoskeletal ultrasound course, is a combination of lectures and workshops on the principal applications of musculoskeletal ultrasound in children, ultrasound scanning of paediatric joints and basic ultrasound abnormalities in children with rheumatic diseases. The course is recommended to rheumatologists or paediatricians with special interest in paediatric musculoskeletal ultrasound.

The 24th EULAR Ultrasound Courses will take place on 11-13 June 2017,
The PReS US course will take place on 12-14 June 2017
All courses in Madrid, Spain

Applications are now open! EULAR grants 20 bursaries to young rheumatologists attending the intermediate, advanced level courses or the paediatrics US course to cover part of the attendance fee

For additional information and to apply: [http://www.eular.org/edu_course_ultrasound.cfm](http://www.eular.org/edu_course_ultrasound.cfm)
Second Summer School in Advanced Musculoskeletal Epidemiology

July 3rd – 7th 2017
Manchester, UK

Who is the course for?
Clinicians, allied health professionals, and researchers working in musculoskeletal disease

Course content
Big data; Longitudinal studies; Pharmacoepidemiology; Clinical trials; Causal inference

How much will it cost?
£1,250
Includes course materials, all accommodation and meals

For more information and to register visit: http://www.confercare.manchester.ac.uk/events/ame2017
EULAR-ENDORSED COURSE ON SYSTEMIC LUPUS ERYTHEMATOSUS

This course on SLE takes place once every 2 years and is aimed at young rheumatologists under 40 years of age and fosters international collaboration among experts. The attendees learn about the major clinical, pathogenetic and therapeutic aspects of SLE. Much time is devoted to the clinical discussion of personal experience in the management of SLE patients, and participants are encouraged to discuss difficult clinical cases followed at their units. The sessions also include practical exercises and case discussions to improve the clinical skills of the attendees.

The 8th EULAR Imaging Course will take place on 21-26 May 2017 in Pisa, Italy. EULAR grants up to 10 bursaries of 1000EUR each to cover part of the registration fee to young rheumatologists. Application deadline is 16th March 2017

For more information and to apply: http://www.eular.org/edu_course_sle.cfm

SHARE YOUR IDEAS!

Over the years EMEUNET has developed several projects covering different topics and areas of interest. However, we appreciate any suggestions and welcome new ideas to expand on what we currently offer to EMEUNET members.

Make your voice be heard and share with us your ideas!

It is easy, just write down some lines to summarize your proposal and send it either via email at emeunet@eular.ch or through our website (http://emeunet.eular.org/contact_us.cfm). Don’t forget to provide your contacts so we can come back to you for additional details!

We look forward to hearing from you!!!
