SPECIAL EDITION: THE COUNTRY LIAISONS

Dear young professionals in rheumatology,

We are delighted to present the 2021 edition of the EULAR | EMEUNET Country Liaisons Newsletter. The Country Liaisons (CLs) are our representatives at the national level. Their work, in close collaboration with our team in the Country Liaisons Sub-Committee, makes it possible to maintain an active network able to reach a substantial number of young rheumatologists, researchers, and allied professionals within the field.

The CLs are the bridge between the EULAR | EMEUNET working group and the members of our community in different countries as well as national rheumatology societies. As such, they are a crucial pillar that supports our initiatives contributing not only to the success of our network but also to that of our members at an individual level by bringing them opportunities for research, training and working across Europe.

In this issue, we will introduce new CLs who have recently joined our team and acknowledge the work of the ongoing as well as those leaving the position. We will also highlight the performance of CLs who excelled in their role.

We are aware of the difficulties experienced by most of our members coping with the successive waves of the current pandemic. Therefore, we would like to thank all our CLs who resiliently managed to keep our activities going on. I would also like to acknowledge the work of my colleagues within the CL subcommittee for their compromise.

We hope you enjoy reading our Newsletter and please feel free to reach us for any comments or questions!

Sebastián C Rodriguez-García  
*on behalf of the Country Liaison Sub-Committee*

Mary Lucy Marques and Mikhail Protopopov  
*on behalf of the Newsletter Sub-Committee*
The aims of the Country Liaison Sub-Committee are:

1) To maintain an active CL network: Our sub-committee establish fluid communication with CLs to support them on their tasks, receiving their feedback, and try to put their proposals into practice. For this, we send out periodic reminders and materials, organize regular TCs, and are always available to provide assistance.

2) To promote and disseminate EULAR | EMEUNET and its initiatives: By supporting our CLs, we can reach young rheumatologists, and allied professionals, attract them to become members, and to participate in our activities. Our CLs disseminate the information we send them among their colleagues within their country. They also develop activities to increase the visibility of EULAR | EMEUNET and report back on so we can boost their visibility through our website and Social Media channels. To assist in this task, we produce and maintain a repository of materials that are constantly updated, and with their help, we obtain translations to further increase the possibilities of reaching more potential new members.

3) To increase the visibility of CLs and their actions: We give more visibility to the work of our CLs by posting them on our website, social media channels, and our annual newsletter, where we also highlight their promotional activities and those who had an outstanding performance.

WELCOME TO OUR NEW COUNTRY LIAISONS 2020/2021

Dóra Sárvári
MD

Dóra Sárvári is a medical doctor since 2016, currently working at the Immunology Department of Rheumatology Centrum, Budai Igalmasrendi Kórház, Budapest, Hungary.

She occasionally teaches medical students and prepares presentations for Immunologic and rheumatologic conferences.

Her major interests include scleroderma and lupus, ultrasonography of joints and teaching medical students.

sarvari.dora@gmail.com

Heidi Kokkonen
MD PhD

Heidi Kokkonen is currently working as a Resident Physician at the Rheumatology Department, Public Health and Clinical Medicine, Norrlands University Hospital, Umeå, Sweden.

Her research area is risk factors for the development of rheumatoid arthritis (RA) and is also currently studying the associations of risk factors for cardiovascular disease (CVD) prior to diagnosis of RA in relation to later development of RA and CVD. Heidi Kokkonen has recently been selected as a board member of the Swedish Rheumatology Association.

heidi.kokkonen@umu.se

Féline Kroon
MD PhD

Féline Kroon graduated from medical school at the University of Maastricht, The Netherlands, in January 2015. Thereafter, she worked as a PhD student at the Rheumatology department of the Leiden University Medical Center, The Netherlands. She received her PhD for research into treatment and outcome measurement in hand osteoarthritis in November 2020.

Since March 2019 she is a rheumatology trainee at the Zuyderland Medical Center in Heerlen, The Netherlands. Féline is a member of the young Dutch Arthritis Association and has been involved as a fellow in EULAR management recommendations projects, being an active member in two OMERACT working groups.

felinekroon@gmail.com

Andrew Melville
MD

Andrew Melville is a clinical research fellow and first year PhD candidate at the Institute of Infection, Immunity and Inflammation in Glasgow.

Prior to this he spent two years in Leeds as a rheumatology registrar and academic clinical fellow. He studied medicine in Cambridge and London, then did his pre-specialisation foundation and core medical training in London. During this time he also undertook an MSc in Musculoskeletal Sciences at NDORMs in Oxford.

His current research focus is around psoriatic arthritis and experimental medicine.

## ONGOING COUNTRY LIAISONS – 2020/2021

### Albania

**Enida Xhaferi, MD PhD**

Enida graduated as a medical doctor at the University of Tirana in Albania and gained her rheumatology specialization at QSUT Hospital, Albania.

Her main research interests are radiographic axial spondyloarthritis, rheumatoid arthritis and rehabilitation.

enida_xhaferi@yahoo.com

---

### Armenia

**Anna Petoyan, MD**

Anna graduated as a medical doctor from the Yerevan State Medical University in 2013. She currently works as resident in rheumatology in the “Muratsan” University Hospital.

Her main research interests are antiphospholipid syndrome, rheumatoid arthritis, systemic lupus erythematosus, systemic sclerosis and vasculitis.

petoyan91@gmail.com

---

### Austria

**Philipp Bosch MD**

Philipp studied at the Medical University of Graz until 2017, and has done diverse exchange programs in Germany, Italy and the USA, as well as the United States Licencing Examination.

Currently, he is a PhD and research fellow at the Medical University of Graz at the department of Rheumatology and Immunology. His research is focused on biomarkers in psoriatic arthritis. Another interests include imaging in rheumatic diseases.

philippbosch@gmx.at

---

### Belarus

**Anastasyia Tushina, MD PhD**

Anastasyia has completed her PhD and she currently works as an assistant in the 2nd Department of Internal Diseases at Belarusian State Medical University, Minsk, Belarus.

Her main research interest is secondary amyloidosis in patients with rheumatoid arthritis.

chastya@rambler.ru

---

### Belgium

**Ayten Ishchenko, MD**

Ayten is a young rheumatologist and PhD fellow working in KU Leuven, Belgium.

Her main research interests are spondylarthritis, psoriatic arthritis, imaging, musculoskeletal ultrasound. He is also a member of the EMEUNET Country Liaisons Sub-Committee.

alla.ishchenko@telenet.be

---

### Bosnia and Herzegovina

**Hamdija Mujaric MD**

Hamdija graduated as a medical doctor from the Military Medical Academy in 2007. He currently works in the rheumatology department at the university clinic in Sarajevo.

His main research interests are echography of the abdomen and locomotor system, and biological therapy in rheumatic diseases.

**Vasilia** graduated as a medical doctor from the University “Carol Davila” in Bucarest in 2012. She currently works as a rheumatology specialist in private health care.

Her main research interests are musculoskeletal ultrasonography and Sjogren’s Syndrome.

**Elizaveta** obtained her medical degree from the Medical Faculty of the St. Petersburg State University, Russian Federation. She has started her PhD studies at the same university in September 2017.

Her main areas of interest are axial spondyloarthritis and psoriatic arthritis.

**Jelena** completed her PhD in the Epidemiology department at the Faculty of Medicine in Belgrade. She currently works as a specialised doctor at the Institute of Rheumatology, Belgrade.

She was a member of the organizing committee of 10th ORPHEUS conference in Belgrade in 2015 and is a member of the EUSTAR Young investigators group from April 2018.

**Ulrika** completed her MD at Comenius University and defended her PhD thesis at the Slovak Medical University, Bratislava.

She is currently working as a rheumatologist in training at the National Institute of Rheumatic Diseases in Piestany, Slovakia.

Her professional and scientific interests focus on biological therapy and prognosis of treatment of rheumatoid arthritis.

**Jaka** graduated from the Faculty of Medicine, University of Ljubljana.

He currently is a resident and PhD student at the Department of Rheumatology in Ljubljana.

He is interested in clinical research, mostly in the field of vasculitis, and will soon start to investigate rheumatic manifestations of cancer immunotherapy.

**Valentina** graduated as medical doctor from the Pontifical Catholic University of Chile in 2014, where she was an undergraduate clinical research assistant for the Rheumatology Department and teaching assistant. She also conducted an elective internship in Rheumatology in Baden. Since 2016, she is a Rheumatology Resident in Madrid.

Besides the clinical practice, she is focused on medical education and clinical research, particularly regarding spondyloarthritis and systemic autoimmune diseases.

Muriel is a medical doctor, currently being an Assistant at the Department of Rheumatology, University of Zürich. She performed a PhD in Immunology (mouse models of systemic sclerosis). After working in Paris as Assistant in Rheumatology for four years she moved to Zürich, working as a postdoc in the Center of Experimental Rheumatology on the epigenetic changes of synovial fibroblasts in joint diseases.

Su-Ann graduated as a medical doctor from the University of Nottingham in 2012. She currently works as Rheumatology Clinical Research Fellow at University College London. Her main research interests are bDMARDs, rheumatoid arthritis, T-cells, TNF-alpha and treatment strategies.

Ufuk graduated as a medical doctor from the Hacettepe University Medical School in 2011. He currently works as a research assistant in the Department of Rheumatology at the Trakya University Medical School in Edirne.

Olena got her PhD degree in 2010 and since 2013, she has been undertaking post-doctoral research in the field of systemic vasculitides. She currently works as Associate Professor in the Department of Internal Medicine N2 at the Danylo Halytsky of the Lviv National Medical University.
The role of the EMEUNET Country Liaisons requires networking and continuous communication. Our Country Liaisons usually rotate every 3 years. This offers all young fellows in each country the chance to actively represent EMEUNET at the national level.

We warmly thank the Country Liaisons who handed over their role and work to new fellows in 2019-2020, and count on their support for EMEUNET in the future!

MEET THE COUNTRY LIAISONS

APRIL 2021
Although the current pandemic posed a difficult scenario, it has not stopped our Country Liaisons! Here are some of the activities they promoted during the present year.

**Jean-Guillaume Letarouilly**, our CL for France collaborates with the “Rhumatologues En Formation” section of the national society and promoted EMEUNET at the general assembly of their national congress.

Our CL for Spain, **Valentina Emperiale** is also a crucial member of the young section of the Spanish Society for Rheumatology (JOVREUM) and continues to actively spread EMEUNET initiatives!
COUNTRY LIAISONS IN ACTION

COUNTRY LIAISONS ACTIVITIES

Olena Zimba, the EMEUNET CL for Ukraine, did a fantastic job on an article about the history of Rheumatology in Ukraine and future perspectives. EMEUNET was there!

Perspectives of Ukrainian rheumatology

The only workable strategy for the development of Ukrainian rheumatology relates to the integration with global rheumatology centers of excellence. Exemplary, young generation of Ukrainian rheumatologists takes part in the EMEUNET activities. The number of Ukrainian members is doubled in 2018 (37) [43]. In view of this small positive change, it is advisable to form the Young Rheumatologists Forum within the frames of the ARU.

Anne Kerola, our Finnish CL, liaised with her national Society and prompted the addition of a link to our network on the Finnish Rheumatology Society’s website. This will be very helpful for our community to grow in that country.

Francesca Crisafulli, our CL from Italy, did not miss the opportunity during the Italian Society of Rheumatology (SIR) Congress to promote EMEUNET. SIR young are unstoppable!
Mira Merashli, our CL from Lebanon, joined the #Weararmask campaign on Twitter!

Keeping wearing the mask even if you got the vaccine
#WearA MASK 😇 #SocialDistance #FlattenTheCurve
الرجاء الالتزام بلبس الكمامة حتى بعد أخذ اللقاح 🙏

Our CL from Austria, Philipp Bosch, also joined the #Weararmask campaign! He currently contributes to the Austrian society of rheumatology (ÖGR) SoMe accounts where he actively promotes our community!

Thank you very much for keeping on promoting EMEUNET in this difficult year!
EMEUNET ADVERTISING MATERIALS

The new EMEUNET flyers

The ‘Why become an EMEUNET member’ and the ‘Why join EMEUNET’ flyers have been updated to fit the new EULAR | EMEUNET aesthetics.

These flyers include a brief summary of our network’s mission and the opportunities offered to those willing to join. All materials are available for Country Liaisons in a dedicated repository.

The updated flyers with the new EMEUNET logo

The EMEUNET translated flyers

Since 2018, the Country Liaisons Sub-Committee together with the Country Liaisons have collaborated for the translation of the two main EMEUNET promotional flyers into different languages.

This is a two-step process in which one EMEUNET member translate the documents and another one review this work. Our material repository now includes flyers translated to Turkish and Finnish.

We thank all of those who contributed to this project!
Anne Kerola and Joonas Rautavaara from Finland
Ertugrul Cagri Bolek and Erdal Sag from Turkey
This year has been unique for everyone, as the traditionally held face-to-face country liaison meeting went virtual in the context of the EULAR E-Congress, due to the COVID-19 pandemic. Nevertheless, the participation of the Country Liaisons was outstanding with high attendance outnumbering previous editions.

This year, Jelena Colic (Serbia), George Fragoulis (Greece) and Philipp Bosch (Austria) presented their work. Afterwards, all CLs engaged in discussing their relationship with their national societies and how they managed to establish contact and work along with them. Before closing the meeting, the traditional survey used to be sent to each CL was changed for a live one using Kahoot!. Therefore, we were able to have our discussion in a more ludic way. Again, many ideas were brought into the discussion that will be put into practice for upcoming projects.

Despite not being able to have our annual meeting the way we used to, it was a pleasure sharing this experience with all the Country Liaisons and members of our subcommittee.

This year we will have the opportunity to meet again and resume our discussion to keep our work moving on. Thank you for your efforts during these difficult times!
EULAR | EMEUNET: Our Community in numbers

The Country Liaisons work for the spread of our network in their countries. The number of EULAR | EMEUNET members varies between countries and is one of the aspects we use to assess the performance of each Country Liaison. Below you can find the current top 10 countries with the most members of our community and the ones with the best recruitment figures over the past year.

### Top ten countries with most EULAR | EMEUNET members until March 2021

<table>

THE OUTSTANDING COUNTRY LIAISONS IN 2021

Being a Country Liaison requires continuous effort and significant commitment for spreading the EMEUNET voice at the national level. **We are happy to acknowledge the work of Country Liaisons who had an outstanding performance.**

For such recognition, we considered recruitment figures, promotion of our network at national events, communication with the Country Liaisons subgroup. The choice is always difficult, but mostly in this burdensome year due to the challenges posed by the current pandemic.

Although we highlight three of the most active Country Liaisons, **we would like to express our gratitude to all of them for their continuous dedication to making the EMEUNET network bigger and better!**

A big thank you to Francesca (Italy and San Marino), Su-Ann Yeoh (UK) and Elizaveta (Russia)!

Francesca Crisafulli  
Italy and San Marino

Su-Ann Yeoh  
UK

Elizaveta Vasilenko  
Russia

**CONGRATULATIONS FOR YOUR TERRIFIC WORK!**
THE COVID-19 EXPERIENCE

COVID-19 has changed our everyday work routine. We’ve asked our CL’s their experience during the pandemic about the difficulties they’ve found and how they engaged to develop the CL activities. The UK Country Liaisons kindly accepted the challenge!

“My research studies got interrupted and I was redeployed to clinical medicine to help out with COVID-19 work”

Su-Ann Yeoh
UK CL (England)

“Moving up back to Glasgow in August has had an impact in terms of difficulty to get to know the other research fellows and clinical team”

Andrew Melville,
current UK CL (Scotland)

“I’m really excited now when the actual real-life patient comes in a clinic and I can listen to someone’s chest, do a proper clinical examination… Probably partially I’m de-skilling because we spent lots of time talking to patients rather than seeing them”

Marina Frleta-Gilchrist
Former UK CL
(Scotland)

“Most of our clinics are telephone clinics, we only see new patients and urgent reviews in person”

“Having all these online teaching meetings, I think it almost felt there was an overload of that at the start… but now I’m starting to appreciate the benefits of it”

If you’ve enjoyed knowing about their experience and want to know more, we will soon publish the full edited interview.

Keep tuned and more countries to come!
EULAR during the Covid-19 Pandemic.

EULAR continues to provide valuable content and guidance for clinicians and patients with Rheumatic Musculoskeletal Diseases (RMDs) around the world during the COVID-19 pandemic.

Access the **EULAR COVID-19 Repository for clinicians** - a dedicated space for clinicians and patients where all COVID-related resources and guidelines are concentrated.

- EULAR guidelines:
  - COVID-19 Clinic visit guidelines
  - EULAR provisional recommendations for the management of rheumatic and musculoskeletal diseases in the context of SARS-CoV-2

- Factors associated with COVID-19-related death in people with rheumatic diseases

- Plain Language Summaries of the COVID-19 Global Rheumatology Alliance

- **EULAR - COVID-19 Reporting database for rheumatologists and other clinicians.**
  - The EULAR - COVID-19 Database is a European pediatric and adult database to report on outcomes of COVID-19 in patients with RMDs. It has been updated with Module 2 – reports on cases of vaccination against SARS-CoV-2 of patients with RMDs are now being collected. The page also contains national registries.

- Information on vaccination against SARS-CoV-2 in patients with RMDs:
  - EULAR December 2020 View points on SARS-CoV-2 vaccination in patients with RMDs by Prof. Johannes Bijlsma.
  - EULAR PARE Webinar on COVID-19 and vaccination in RMD patients: What we know so far

Recently the **EULAR points to consider on pathophysiology and use of immunomodulatory therapies in COVID-19** have been published in Annals of Rheumatic Diseases. They summarize information that has been gathered so far on available treatment options and pathogenic mechanisms in COVID-19, based on published studies. These are the points to consider for finding optimal management options in patients with SARS-CoV-2 infection.
Date & Time: Monday, 12 April 2021, 17:30 – 19:10 CEST
Description: The webinar aims to address the dramatic need for rheumatologists, health professional working in the field of rheumatology and people living with rheumatic diseases to be aware of the economic issues around the impact and the care of rheumatic diseases. The presentations will develop why and how active participation of professionals and patients may facilitate the development of more optimal rheumatology care across Europe (and other continent) and larger access to therapeutic innovation.
Target audience: This is an educational activity targeting people working in the field of rheumatology as well as people affected with rheumatic conditions. The webinar aims to make a non-expert audience more familiar with rheumatic disease economic impact as well as economic assessment of therapeutic innovations.
Scientific Organisers: Bruno Fautrel (France), Francis Guillemin (France)
Speakers: Annelies Boonen (Netherlands), Bruno Fautrel (France), Francis Guillemin (France), Maarten de Wit (Netherlands), Manuela Joore (Netherlands), Sabine Grimm (Netherlands)
Program: available online
Venue: Online, esor.eular.org
Course fee: Free of charge
Registration: You will need to login to your EULAR School of Rheumatology account to register. If you do not have a School account, you will need to create one before registering. After you have logged in, click on the "Enrol me" button to register for the webinar.

UPCOMING EULAR WEBINARS

EULAR-AFLAR Webinar Series – Webinar 2

Date & Time: Saturday, 15 May 2021, 09:00 – 10:00 CEST

Description: EULAR and AFLAR have developed a collaborative educational program based on a series of Webinars on different topics that are of interest for the AFLAR community. The second seminar of the Series is devoted to the Epidemiology of Rheumatic Diseases

Target audience: This programme is addressed to trainees, young Rheumatologists but also to experienced Rheumatologists who can be interested in specific topics.

Scientific Organisers: Prof. Johannes Bijlsma (Netherlands)

Speakers: Prof. Johannes Bijlsma (Netherlands), Dr. Pedro Machado (United Kingdom), Dr. Hakeem Olaosebikan (Nigeria)

Program: available online

Venue: Online, esor.eular.org

Course fee: Free of charge

Registration: No formal registration needed. The webinar link will be available above on 15 May 2021, two hours before the webinar at 07:00 CEST. Microsoft Teams will be used for the webinar. The webinar room will open 10 minutes before the webinar starts
EULAR | EMEUNET’s “Improve your poster presentations!” webinar – recording available soon

The EULAR | EMEUNET Webinar “Improve your poster presentations”, hosted by Felice Rivellese, Sebastián Rodriguez-García, Manouk De Hooge, starring Catherine Haines and Loreto Carmona, was held on March 16th at 8 pm (CET) and was a great success. The webinar aimed to provide tools for creating posters from scratch and present them at scientific congresses. It was designed as an interactive exercise where attendants could share their views and doubts with the faculty.

The recording will be available shortly on our YouTube channel!
EULAR 2021 virtual again

June 2\textsuperscript{nd} – 5\textsuperscript{th}, 2021

EULAR has decided to hold the EULAR 2021 Congress virtually again to protect everyone's health and safety. For more information, read the message by the EULAR President Ian McInnes.

The EULAR European Congress of Rheumatology comprises the major event in the calendar of world rheumatology. The EULAR 2021 Virtual Congress will address a wide range of topics including clinical, translational and basic science. Sessions dedicated to People with Arthritis and Rheumatism in Europe (PARE), Health Professionals in Rheumatology (HPR) will feature prominently.

Registration for the EULAR Virtual CONGRESS is now open

View the EULAR 2021 Congress Scientific Programme (web version)

Final programme (PDF)
CALL FOR LATE-BREAKING ABSTRACTS TO EULAR 2021

EULAR invites you to submit a late-breaking abstract to the European Congress of Rheumatology, EULAR 2021, to take place as a virtual Congress.

Clinical and scientific breakthroughs will be selected for late-breaking abstract presentations to participants of EULAR 2021, based on merit, timeliness and interest by the Scientific and Abstract Committees. The late-breaking research is limited to highly significant and timely findings in rheumatology that were not available by 31 January 2021 (the deadline of regular abstract submission).

Submit your late breaking abstract:

Opening 13 April 2021
Deadline 29 April 2021

More information available on the EULAR Congress website.
All over Europe, COVID-19 cases have been rapidly increasing again. This has mainly been driven by the younger population. @EMEUNET has started the social media campaign: #wearamask. The aim of this is to raise awareness for the need to wear a mask and follow social distancing to slow the infection rate of COVID-19 and “flatten the curve”. Through our social media channels, we are spreading the message, especially to the younger population, to slow down the infection rates and therefore protecting vulnerable groups like elderly people and people with RMD’s and to reduce the amount of hospitalized COVID-19 patients. Therefore, EMEUNET is posting pictures and videos of its members wearing a mask and sharing important messages of who they are wanting to protect. We encourage all of you to join in! Share your photos and messages marking them with the #wearamask hashtag, and do not forget to endorse the @EMEUNET Twitter or @EMEUNET Facebook account!.

Check out a message from our Chair Felice Rivellese on our Youtube channel!
EMEUNET PODCASTS!

Are you too busy to read the whole Newsletter? 
Do you want to keep updated about the main EMEUNET activities and save time?

With our Podcasts, you can get updated while on the go, with extracts of the recent newsletters, highlights of the most recent publications in the field of Rheumatology, selected for you by EMEUNET members (What Is New), interviews and review of other EMEUNET activities.

**SHARE YOUR IDEAS!**

Over the years EMEUNET has developed several projects covering different topics and areas of interest. However, we always appreciate any suggestions and welcome new ideas to expand on what we currently offer to EMEUNET members. Make your voice heard and share your ideas with us!

For additional suggestions and ideas, just write down some lines to summarize your proposal and send it either via email at emeunet@eular.ch or through our website (http://emeunet.eular.org/contact_us.cfm). Don’t forget to provide your contacts so we can come back to you for additional details!
