EULAR 2021 VIRTUAL CONGRESS

Dear young rheumatologists and researchers in rheumatology,

We are excited to present you with a new issue of EMEUNews dedicated to the Highlights of this year's EULAR annual meeting. Virtual once again this year due to COVID-19 pandemic-related restrictions, the event was excellently organized, incorporating all the essential elements that would typically be presented during the live event: oral abstract sessions, invited talks, poster sessions, plenaries, booths, YouTube broadcasting etc. Amazing opportunities of a live interactions with the presenters and other participants were provided.

In this issue, we offer a fine selection of oral reports and posters from the various areas of rheumatology. The selection reflects personal views of the contributors, thus inevitably incomplete; nevertheless, it provides a comprehensive overview of hot topics that were discussed in each field. All congress abstracts are available in the EULAR [Abstract archive](#), (links will be working after you select „2021 Virtual Congress“ in the congress list) giving a great opportunity to those who could not join live to check the presentations at your convenience.

In the current circumstances, social media became a great addition to the conventional networking opportunities usually available during the congress. EMEUNET is immensely active in social media networks, such as Facebook and Twitter, maintains its original website and robust visibility in major rheumatology scientific events. If this is your first contact with EMEUNET, we invite you to explore more and join us. If you are already part of our community, we kindly remind you to spread the word about our activities and work to reach more young rheumatologists and researchers.

We hope you enjoy reading this Newsletter. We always welcome feedback, comments, suggestions, and contributions. With this editorial, we wish you a prolific and successful summer and hope to see you next year again personally in Copenhagen.

Tadeja Kuret and Mikhail Protopopov, on behalf of the EMEUNET Newsletter Sub-Committee
